# **Earthquake Response:**
# What to Do During and After the Shaking

Objectives:

After completing this chapter, you will be able to:

- ✧ Stay calm and act safely during an earthquake.
- ✧ Evacuate properly after the shaking stops.
- ✧ Avoid dangerous actions during and after an earthquake.
- ✧ Check for injuries and hazards after the quake.

# What to Do During an Earthquake?

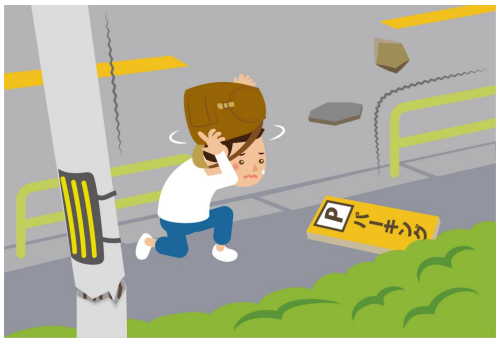

*When strong shaking starts—**STAY CALM**.*

**If you're INDOORS:**

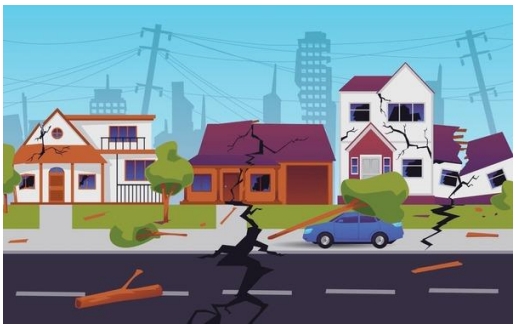

- ✧ Protect yourself.
- ✧ Stay away from falling objects like glass, ceiling fans, and hanging items.
- ✧ Get under a sturdy table or desk and do the "DUCK, COVER, and HOLD."
- ✧ Be alert and keep your eyes open.
- ✧ Stay where you are until the shaking stops.

**If you're OUTDOORS:**

- ✧ Move to an open area, away from buildings, trees, power lines, and posts.
- ✧ Avoid steep slopes that could be affected by landslides.
- ✧ If you're near the shore and feel a strong earthquake, move immediately to higher ground—a tsunami may follow.

**If you're in a MOVING VEHICLE:**

- ✧ Stop safely and get out.
- ✧ Avoid bridges, overpasses, and flyovers—they may be damaged.

## AS SOON AS THE SHAKING STOPS

- ✧ Leave the classroom immediately.
- ✧ Exit the building in a calm and orderly manner.
- ✧ Go directly to the designated evacuation area.

## WHAT NOT TO DO AFTER AN EARTHQUAKE

- ✧ **WALK**—Do not run.
- ✧ **DO NOT PUSH** – Keep everyone safe.
- ✧ **DO NOT TALK**—Stay focused and listen for instructions.
- ✧ **DO NOT PANIC**—Stay calm and follow safety instructions.
- ✧ **Do not use elevators**—They may get stuck or fail during aftershocks.
- ✧ **Do not enter damaged buildings**—They could collapse or have hidden dangers.
- ✧ **Use phones only for emergencies**—Keep lines open for urgent calls.

## WHAT TO CHECK:

- ✧ Check yourself and others for injuries.
- ✧ Inspect water and electrical lines for damage.
- ✧ Look for spills of chemicals or toxic or flammable materials.
- ✧ Watch for fires and try to control them before they spread.
